

Identification

| | |
|--------------------|--|
| Model No | TPUK-MDU-20-LS |
| Description | Bespoke 25L Mobile Decanting Trolley in Stainless Steel. Consisting of T50PTT Diaphragm Pump, Air Treatment Kit, PTFE Lined Hosing, Drainage Point and Shepherd's Crook discharge. |

Materials and specifications

| Part description and part No | Material description |
|------------------------------|---|
| Trolley | Stainless Steel AISI 304, 4x Nylon Wheels (Rear Swivel & Locking) |
| Pump Construction (Wetted) | Solid Block HDPE |
| Pump Internals (Wetted) | PTFE TFM Diaphragms, Virgin PTFE Valve Balls |
| Hosing (Wetted) | PTFE Convuluted with Stainless Steel Overbraid |

General data

| | |
|-----------------------|--------------------|
| Dimensions, L x W x H | 753 x 304 x 970 mm |
|-----------------------|--------------------|

Optional Extras

| | |
|-----------------|---|
| Batcher | Automated On/Off control for accurate dosing. |
| 25L Vessel | Inclusion of 25L Drum (as pictured) |
| 100L Vessel | Inclusion of 100L Drum |
| Full PTFE Build | Pump is constructed completely from PTFE - For use with particularly aggressive chemicals. |
| ATEX Rated | Pump, Batcher, Trolley and Hosing are all constructed from Anti-Static materials for use within ATEX areas / applications |
